

Swiss Post Solutions (SPS) Privacy Statement on the use of Cookies

Our use of cookies

This SPS website uses two types of cookies to assist users to make full use of the site's functionality.

- One cookie is a persistent cookie, activated if the user ticks the 'remember me' box and is purely used to record user details (not the password) so that when the user returns to the site, the user details are remembered. This cookie can be [disabled](#) with no loss of functionality.
- The other type is a session cookie and is an integral part of the way the site functions. A minuscule encrypted file is placed on the user's hard drive when the 'session' with our server is initiated. This file is used for security purposes throughout the time of the site's use to identify that the same PC is always being used. Once the user logs out, this session cookie is deleted. If this cookie is [disabled](#), the site will not function.

SPS will not use these cookies to track or to collect any personally identifiable information of visitors to our site. We will not associate any data gathered from this site with any personally identifying information from any source. SPS will not link, or seek to link, an IP address with the identity of a computer user.

Further Information about Cookies

The [Interactive Advertising Bureau](#) (IAB) is an industry body that develops standard and guidelines to support online business processes. It has produced a series of web pages which explain how cookies work and how they can be managed.

Disabling and Enabling Cookies

You have the ability to accept or decline cookies by modifying the settings on your browser. The IAB site tells you how to remove cookies from your browser.
